PROFESSIONAL SUMMARY

Full-stack Software Engineer with 2+ years building production systems in C#/.NET, Java/Spring Boot, Angular, and React for high-availability platforms. Skilled in designing scalable microservices, cloud-native REST APIs, and AI-integrated applications, with strong foundations in system design, distributed systems, SQL/NoSQL databases, CI/CD, and applied ML/LLM pipelines. Pursuing M.S. at Northeastern; seeking Summer/Fall 2026 Software Engineering co-op and internship opportunities.

EDUCATION

Northeastern University - M.S., Information Systems Expected Dec 2027 | GPA: 3.85

Coursework: Web Development & UX, Program Structures & Algorithms, Gen AI with LLMs for Data Engineering

Ajeenkya DY Patil University - B.Tech, Computer Engineering (AI) Graduated May 2023 | GPA: 3.50

Coursework: Data Science, Neural Networks, Soft Computing, Computer Vision, NLP

TECHNICAL SKILLS

Languages: Java, Python, C#, C++, TypeScript, JavaScript, SQL

Backend: Spring Boot, Hibernate/JPA, .NET Core, ASP.NET Web API, Node.js, Express, REST APIs, GraphQL, Microservices

Frontend: Angular, React, Next.js, Redux, RxJS, Tailwind CSS, Bootstrap

Databases & Messaging: PostgreSQL, MySQL, MongoDB, SQL Server, Redis, RabbitMQ, WebSockets

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, GitHub Actions, Azure DevOps, CI/CD

AI / ML: LangChain, RAG, LLMs, Generative AI, Scikit-learn, Pandas, NumPy, Prompt Engineering

Testing & Tools: JUnit, Mockito, xUnit, Jasmine, Postman, Swagger, JIRA, Git

EXPERIENCE

Associate Software Engineer - Flextronics LTD Feb 2023 - Aug 2025

C# | .NET Core | ASP.NET Web API | Angular | React | TypeScript | SQL Server | Redis | Azure DevOps

- Led system design and delivery of full-stack medical device modules for a platform serving 10K+ daily users using C#, .NET Core, ASP.NET Web API, Angular, and React in a 3-developer Agile Scrum team.
- Architected secure RESTful microservices with JWT, RBAC, OpenAPI/Swagger, and Redis caching across 15+ service endpoints, improving API response times and reducing repeat-query load on the database.
- Optimized T-SQL queries, indexes, and stored procedures on SQL Server, reducing application response times by roughly 30% on key data-heavy workflows.
- Shipped production releases through Azure DevOps CI/CD with xUnit and Jasmine test suites, shortening deployment cycle time by ~40%; mentored 3 interns on architecture, Git workflows, and secure coding practices.

QA Test Engineer - GlobalStep LLC

May 2019 - Feb 2021

Manual & Automated Testing | JIRA | Azure DevOps | SQL | Postman | SDLC

- Designed and executed 150+ test cases across functional, regression, integration, and system testing for web and backend platforms, catching critical defects pre-release.
- Led root cause analysis and managed full defect lifecycle in JIRA and Azure DevOps across cross-functional releases, partnering with developers to shorten resolution cycles.

PROJECTS

OpsCanvas - Workflow & Task Management System

Sept 2025 - Dec 2025

Spring Boot | Hibernate/JPA | PostgreSQL | Docker | Kubernetes | REST APIs | JUnit

- Engineered a modular Spring Boot workflow engine with Hibernate/JPA on indexed PostgreSQL schemas for efficient relational queries and workflow state management.
- Secured REST endpoints with Spring Security and JWT, documented APIs via OpenAPI/Swagger, and packaged the service with multi-stage Docker builds for Kubernetes-ready deployment.

Husky AI - University Support Platform

Sept 2025 - Dec 2025

Angular 17 | Node.js | Express | MongoDB | REST APIs | JWT

- Built a full-stack support platform with an Angular 17 frontend (standalone components, RxJS, reactive forms) and a Node.js/Express REST backend handling student, faculty, and admin workflows.
- Designed MongoDB schemas with compound indexes for efficient query access, and implemented JWT authentication with RBAC middleware across user roles.

SyncSpace - Real-Time Collaboration Platform

Jan 2026 - Mar 2026

React | Node.js | Native WebSockets | MongoDB

- Built a real-time collaboration app using native WebSockets for bidirectional, low-latency multi-user messaging, tested with 20+ simultaneous clients across multiple rooms.
- Developed a React frontend with custom hooks paired with a Node.js WebSocket server implementing concurrent rooms, message broadcasting, and presence tracking.

PulseIQ - KPI Monitoring & Forecasting System

Dec 2022 - Apr 2023

Python | Scikit-learn | Pandas | NumPy | SQL | REST APIs | AWS

- Developed Python backend services ingesting and analyzing operational KPI data with SQL transformations, exposed via REST APIs deployed on AWS.
- Built ML forecasting models with Scikit-learn, Pandas, and NumPy to predict operational KPI trends from historical time-series data.
